(b) Independent events
(c) Addition and Multiplication theorems
(d) Conditional Probability
(e) Bayes Theorem
9. (a) A bag contains 6 white and 9 black balls. Two drawings of 4 balls are made such that :

The balls are replaced before the second trial. Find the probability that the first drawing will give 4 white and the second 4 black balls in each case.
(b) Write a note on Permutation and combinations.

## Question Paper Code : 1756

B.B.A. (I.B.) (Semester-II) Examination, 2018 STATISTICS FOR BUSINESS DECISION
[ IB-202 ]
Time : Three Hours]
[Maximum Marks : 70
Note: Answer five questions in all. Question no. 1 is compulsory. Besides this, attempt one question from each Unit.

1. Answer the following questions:
$[3 \times 10=30]$
(a) Why is statistics required for business decisions?
(b) What is median ? State its merits and demerits.
(c) What are the limitations of statistics ?
(d) What are cyclicles ?
(e) Why is sampling required ?
(f) What are non-sampling errors ?
(g) In a simultaneous toss of two coins, find the probability of :
(i) Getting 2 heads
(ii) Exactly 1 head
( 1 )
[P.T.O.]
(h) Find out the predicted value of Y , if $\mathrm{X}_{1}=82, \mathrm{X}_{2}=130$. The equation is as follows :

$$
Y_{c}=b_{0}+b_{1} X_{1}+b_{2} X_{2}
$$

(i) How can range be used for business dicisions?
(j) Find out median from the information given :

| Age | 25 | 35 | 42 | 54 | 68 | 73 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Persons | 4 | 6 | 5 | 8 | 3 | 2 |

## UNIT-I

2. (a) Explain briefly the scope of statistics in business decisions.
(b) Discuss various methods of sampling.
3. Find out Mean and Median from the following data on sales in Rs. lakhs :

| Mid Value | 10 | 20 | 30 | 40 | 50 | 60 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 3 | 4 | 6 | 8 | 5 | 4 |

## UNIT-II

4. Find out quartile deviation and Mean deviation from mean from the following data on net worth in crores of Rs. :[10]

| x | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ | $60-70$ | $70-80$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| f | 18 | 16 | 15 | 12 | 10 | 5 | 2 | 2 |

1756/400
(2)
5. Calculate Karl Pearson's coefficient of correlation from the following data :

| x | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| y | 12 | 11 | 13 | 15 | 14 | 17 | 16 | 19 | 18 |

## UNIT-III

6. You are given the following data :

|  | $x$ | $y$ |
| :--- | :--- | :--- |
| Mean | 36 | 85 |
| S.D. | 11 | 8 |
| $r=0.66$ |  |  |

Find out:
(a) Two regression coefficients
(b) Two regression equations
(c) Values of x when $\mathrm{y}=75$
(d) Value of $y$ when $x=60$
7. Explain the components and need of time series analysis for business decisions.

## UNIT-IV

8. Explain the following :
[2x5=10]
(a) Mutually exclusive events

1756/400
(3)
[P.T.O.]
