## Question Paper Code : 1754

## B.B.A. (Semester-VI) Examination, 2018 PROJECT MANAGEMENT <br> [ BBA-606] <br> Time : Three Hours] <br> [Maximum Marks : 70

Note : Answer five questions in all. Question No. 1 is compulsory. Besides this, one question is to be attempted from each Unit.

1. Write short notes on the following :
(a) Entrepreneurial skills of a project manager
(b) Market planning
(c) Resource leveling
(d) Project chart and layouts
(e) Project time lines
(f) Balance sheet and its components
(g) Forms of project organisation
(h) Social cost benefit analysis
(i) Normal time and crash time
(j) Enterprise resource planning

## UNIT-I

2. Distinguish between project and production management with the help of examples using the project and product development cycle.
3. Do the demand analysis for a new product has a potential market size of 500,000 . There is an older product that is similar to the the new product. $\mathrm{P}=0.020$ and $\mathrm{q}=0.075$, derive the industry sales of this older product (Where P is the coefficient of innovation and $q$ is the coefficient of imitation).

What will be the estimates of sales in year 1, 2 and 3 for the new product, according to the Bass diffusion model?

## UNIT-II

4. Explain the factors affecting facility location planning. What are the repercussions if location of a facility is not planned at all ?

| Activity | Predecessor | Duration (in days) |
| :---: | :---: | :---: |
| A | - | 14 |
| B | A | 15 |
| C | B | 25 |
| D | A | 20 |
| E | D | 12 |
| F | A | 9 |
| G | F | 21 |
| H | G | 24 |
| I | C | 16 |
| J | B,I | 18 |
| K | H | 20 |
| L | K | 6 |
| M | E | 8 |
| N | J, C | 7 |
| P | M,G | 10 |

----- X -----
5. Explain the ways in which organizations can reduce emissions that pollute the environment. How recycling help the environment?

## UNIT-III

6. A company has on its books the following amounts and specific costs of each type of capital :

| Type of Capital | Book value | Market value | Specific Cost |
| :--- | :---: | :---: | :---: |
| Debt | $4,00,000$ | $3,80,000$ | 5 |
| Preference share | $1,00,000$ | $1,10,000$ | 8 |
| Equity share | $6,00,000$ |  | 15 |
| Retained earnings | $2,00,000$ | $12,00,000$ | 13 |

Determine the weighted average Cost of capital using (a) Book value weights and, (b) Market value weights. How are the different ? Can you think of a situation where the weighted average cost of capital would be the same using either of the weights?
7. The balance sheet of ABC Ltd. at the end of year $n$ (the year which is just over) is as follows :

| Liabilities | Amount | Assets | Amount (Figures in <br> thousand) |
| :--- | :---: | :--- | :---: |
| Share Capital | 100 | Fixed assets | 180 |
| Reserve and <br> Surplus | 20 | Investments | - |
| Secured loans | 80 | Current Assets | 180 |
| Unsecured loans | 50 | Cash | 20 |
| Current liabilities | 90 | Receivables | 80 |
| Provisions | 20 | Inventories | 80 |
|  | 360 |  | 360 |

The projected income statement and the distribution of earnings for year $n+1$ is given below :

| Particulars | Amount |
| :--- | :---: |
| Sales | 400 |
| Cost of goods gold | 300 |
| Depreciation | 20 |
| Profit before interest and taxes | 80 |
| Interest | 20 |
| Profit before tax | 60 |
| Tax | 30 |
| Profit after tax | 30 |
| Dividends | 10 |
| Retained earnings | 20 |

During the year $n+1$, the firm plans to raise the secured term loan of 20, repay a previous term loan to the extent of 5 , and increase unsecurred loan by 10. Current liabilities and provisions are expected to be remain unchanged. Further, the firm plans to acquire fixed assets worth 30 and increase its inventories by 10. Receivables are expected to increase by 15. Other assets would remain unchanged, excepting of course, cash. The firm plan to pay 10 by way of equity dividend.

Given the above information, calculate the projected cash flow statement for ABC Ltd.

## UNIT-IV

8. Discuss the various quality control methods which are prevalent in project management.
9. The details of activities of construction project are given below. Draw a network and determine job project completion time, critical activities and total float for each activity.
